

USAID
FROM THE AMERICAN PEOPLE

THE U.S. GLOBAL WATER
STRATEGY 2022-2027
MARCH 2023

THE U.S. GLOBAL WATER STRATEGY

- Jointly led by **USAID the Department of State** and delivered to Congress by the Administrator and Secretary
- Updated every **five years through 2027** (*The Water for the World Act requires a strategy be in place until 2032*)

Include:

- **Agency-specific plans** from USAID, the Department of State, and any other relevant Federal Department or Agency
- **USAID High-Priority Country Plans** (Kenya is a High Priority Country)

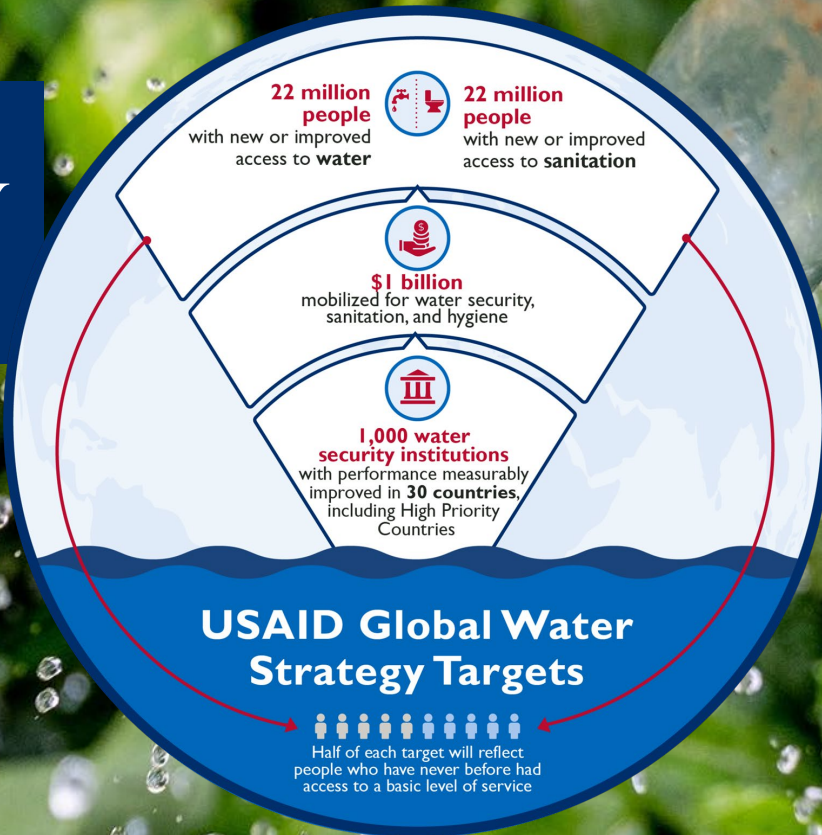

VISION AND GOAL

- **Global Water Strategy Vision**
 - A water-secure world
- **Global Water Strategy Goal**
 - To improve health, prosperity, stability, and resilience through sustainable and equitable water resources management and access practices

OUR GLOBAL WATER STRATEGY TARGETS

USAID RESULTS FRAMEWORK

GWS STRATEGIC OBJECTIVES

STRATEGIC OBJECTIVE 1
Strengthen Water and Sanitation Sector Governance, Financing, Institutions, and Markets

STRATEGIC OBJECTIVE 2
Increase Equitable Access to Safe, Sustainable, and Climate-Resilient Drinking Water and Sanitation Services, and Adoption of Key Hygiene Behaviors

STRATEGIC OBJECTIVE 3
Improve Climate-Resilient Conservation and Management of Freshwater Resources and of Associated Ecosystems

STRATEGIC OBJECTIVE 4
Anticipate and Reduce Conflict and Fragility Related to Water

USAID'S INTERMEDIATE RESULTS

- 1.1 Develop, strengthen, and implement inclusive laws, policies, and regulations
- 1.2 Effectively mobilize and target public and private financing
- 1.3 Improve the capacity and performance of regional, national, and sub-national institutions
- 1.4 Advance transparency, accountability, equity, and efficiency through participatory, data-driven decision-making

- 2.1 Increase area-wide access to safe, equitable, and affordable sanitation services
- 2.2 Increase access to equitable, safe, reliable, and affordable drinking water services
- 2.3 Improve performance and climate resilience of water and sanitation service providers
- 2.4 Increase adoption of key hygiene practices

- 3.1 Allocate and use water resources more equitably and efficiently
- 3.2 Enhance reliability and quality of water resources through watershed management, including protection, restoration, and nature-based solutions
- 3.3 Improve the climate resilience of water resources management

- 4.1 Strengthen capacity to predict, prepare for, and adapt to shocks impacting water and sanitation systems in fragile settings
- 4.2 Address humanitarian water, sanitation, and hygiene needs
- 4.3 Strengthen cooperation and reduce conflict over water
- 4.4 Strengthen coherence across humanitarian, development, and peace approaches to water and sanitation programming

GWS OPERATING PRINCIPLES

Work through and strengthen global, national, and local systems

Focus on meeting the needs of marginalized and underserved people and communities, and those in vulnerable situations

Leverage data, research, learning, and innovation

Incorporate resilience across all aspects of this strategy

GWS STRATEGIC OBJECTIVE 1

Strengthen Water and Sanitation Sector Governance, Financing
Institutions, and Markets

USAID'S INTERMEDIATE RESULTS

- 1.1 Develop, strengthen, and implement inclusive laws, policies, and regulations
- 1.2 Effectively mobilize and target public and private funding
- 1.3 Improve the capacity and performance of regional, national, and subnational institutions
- 1.4 Advance transparency, accountability, equity, and efficiency through participatory data-driven decision making

GWS STRATEGIC OBJECTIVE 2

Increase Equitable Access to Safe, Sustainable, and Climate-Resilient Drinking Water and Sanitation Services and Adoption of Key Behaviors

USAID'S INTERMEDIATE RESULTS

- 2.1 Increase area-wide access to safe, equitable, and affordable sanitation services
- 2.2 Increase access to equitable, safe, and reliable drinking water services
- 2.3 Improve performance and climate resilience of water and sanitation service providers
- 2.4 Increase adoption of key hygiene practices

GWS STRATEGIC OBJECTIVE 3

Improve Climate-Resilient Conservation and Management of Freshwater Resources and of Associated Ecosystems

USAID'S INTERMEDIATE RESULTS

- 3.1 Allocate and use water resources more equitably and efficiently
- 3.2 Enhance reliability and quality of water resources through watershed management, including protection, restoration, and nature-based solutions
- 3.3 Improve climate resilience of water resources management

GWS STRATEGIC OBJECTIVE 4

Anticipate and Reduce Conflict and Fragility Related to Water

USAID'S INTERMEDIATE RESULTS

- 4.1 Strengthen capacity to predict, prepare for, and adapt to shocks impacting water and sanitation systems in fragile settings
- 4.2 Address humanitarian water, sanitation, and hygiene needs
- 4.3 Strengthen cooperation and reduced conflict over water
- 4.4 Strengthen coherence across humanitarian, development, and peace approaches to water and sanitation programming

— GWS OPERATING PRINCIPLES

Work through and strengthen global, national, and local systems

Focus on meeting the needs of marginalized or underserved people and communities, and those in vulnerable situations

Leverage data, research, learning and innovation

Incorporate resilience across all aspects of this strategy

USAID
FROM THE AMERICAN PEOPLE

WHAT WILL WE DO TO ACHIEVE RESULTS IN

KENYA?

Clear roles & responsibilities, mechanisms, and guidance

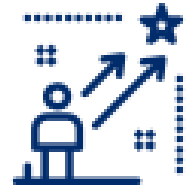

Climate Change

Pandemic, crisis, and disaster response, preparedness and resilience

Marginalized communities, diversity, equity, inclusion and accessibility

Strengthen utilities, governance, finance, private sector partnerships, local capacity

THANK YOU!
