2022–2027

U.S. Global Water Strategy

VISION

A water-secure world

GOAL

Improve health, prosperity, stability, and resilience through sustainable and equitable water resources management and access to safe drinking water and sanitation services and hygiene practices

WATER FOR THE WORLD

The global water crisis threatens U.S. national security and prosperity. Water insecurity endangers public health, undermines economic growth, deepens inequalities, and increases the likelihood of conflict and state failure. Strong water, sanitation, and hygiene services, finance, governance, and institutions are critical to increasing resilience in the face of global shocks and stressors, such as the COVID-19 pandemic and climate change. Under the [2022–2027 U.S. Global Water Strategy](#), the U.S. government will continue to work toward a water-secure world. Through sustainable and equitable water resources management and access to safe drinking water, sanitation services, and hygiene practices, the U.S. government will build health, prosperity, stability, and resilience in collaboration with allies and stakeholders.

STRATEGIC OBJECTIVES

Strengthen water and sanitation sector governance, financing, institutions, and markets

Increase equitable access to safe, sustainable, and climate-resilient drinking water and sanitation services, and adoption of key hygiene behaviors

Improve climate-resilient conservation and management of freshwater resources and of associated ecosystems

Anticipate and reduce conflict and fragility related to water

OPERATIONAL PRINCIPLES

Work through and strengthen global, national, and local systems

Focus on meeting the needs of marginalized and underserved people and communities, and those in vulnerable situations

Leverage data, research, learning, and innovation

Incorporate resilience across all aspects of this strategy
